

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

PHILOSOPHICAL
TRANSACTIONS,
OF THE
ROYAL SOCIETY
OF
LONDON.

VOL. LXXI. For the Year 1781.

PART I.

LONDON,

SOLD BY LOCKYER DAVIS, AND PETER ELMSLY,
PRINTERS TO THE ROYAL SOCIETY.

MDCCLXXXI.

A D V E R T I S E M E N T.

THE Committee appointed by the Royal Society to direct the publication of the *Philosophical Transactions*, take this opportunity to acquaint the Public, that it fully appears, as well from the council-books and journals of the Society, as from repeated declarations, which have been made in several former *Transactions*, that the printing of them was always, from time to time, the single act of the respective Secretaries, till the Forty-seventh Volume: the Society, as a body, never interesting themselves any further in their publication, than by occasionally recommending the revival of them to some of their Secretaries, when, from the particular circumstances of their affairs, the *Transactions* had happened for any length of time to be intermitted. And this seems principally to have been done with a view to satisfy the Public, that their usual meetings were then continued for the improvement of knowledge, and benefit of mankind, the great ends of their first institution by the Royal Charters, and which they have ever since steadily pursued.

But the Society being of late years greatly inlarged, and their communications more numerous, it was thought adviseable, that a Committee of their members should be appointed to reconsider the papers read before them, and select out of them such, as they should judge most proper for publication in the future *Transactions*; which was accordingly done upon the 26th of March 1752: And the grounds of their choice are, and will continue to be, the importance and singularity of the subjects, or the advantageous manner of treating them; without pretending to answser for the certainty of the facts, or propriety of the reasonings, contained in the several papers so published, which must still rest on the credit or judgment of their respective authors.

It is likewise necessary on this occasion to remark, that it is an established rule of the Society, to which they will always adhere, never to give their opinion, as a body, upon any subject, either of Nature or Art that comes before them. And therefore the thanks, which are frequently proposed from the chair, to be given to the authors of such papers, as are read at their accustomed meetings, or to the persons through whose hands they receive them, are to be considered in no other light than as a matter of civility, in return for the respect shewn to the Society by those communications. The like also is to be said with regard to the several projects, inventions, and curiosities of various kinds, which are often exhibited to the Society ; the authors whereof, or those who exhibit them, frequently take the liberty to report, and even to certify in the public news-papers, that they have met with the highest applause and approbation. And therefore it is hoped, that no regard will hereafter be paid to such reports, and public notices ; which in some instances have been too lightly credited, to the dishonour of the Society.

C O N T E N T S

O F

V O L. LXXI. P A R T II.

XV. *NEW Experiments upon Gun-powder, with occasional Observations and practical Inferences; to which are added, an Account of a new Method of determining the Velocities of all Kinds of Military Projectiles, and the Description of a very accurate Eprouvette for Gun-powder.* By Benjamin Thompson, *Efq, F. R. S.* Page 230

XVI. *Account of a luminous Appearance in the Heavens.* By Mr. Tiberius Cavallo, *F. R. S. in a Letter to Sir Joseph Banks, Bart. P. R. S.* p. 329

XVII. *Account of an Earthquake at Hafodunos near Denbigh.* By John Lloyd, *Efq. F. R. S. in a Letter to Sir Joseph Banks, Bart. P. R. S.* p. 331

XVIII. *On the Heat of the Water in the Gulf-stream.* By Charles Blagden, *M. D. Physician to the Army, F. R. S.* p. 334

XIX. *Account of the Appearance of the Soil at opening a Well at Hanby in Lincolnshire.* In a Letter from Sir Henry C. Englefield, *Bart. F. R. and A. S. to Sir Joseph Banks, Bart. P. R. S.* p. 345

XX. *Astronomical Observations made by Nathaniel Pigott, Esq. F. R. S. Foreign Member of the Academies of Bruffels and Caen, and Correspondent of the Academy of Sciences at Paris. Communicated by Sir Henry C. Englefield, Bart. F. R. and A. S.* p. 347

XXI. *Abstract of a Register of the Barometer, Thermometer, and Rain, at Lyndon, in Rutland, 1780.* By Thomas Barker, *Efq.* p. 351

XXII. *Some Calculations of the Number of Accidents or Deaths which happen in consequence of Parturition; and of the Proportion of Male to Female Children, as well as of Twins, monstrosities Productions, and Children that are dead-born; taken from the Midwifery Reports of the Westminster General Dispensary: with an Attempt to ascertain the Chance of Life at different Periods, from Infancy to Twenty-six Years of Age; and likewise the Proportion of Natives to the rest of the Inhabitants of London.* In a Letter from Robert Bland, M. D. Physician-Man-Midwife to the Westminster General Dispensary, to Samuel Foart Simmons, M. D. F. R. S. p. 355

XXIII. *Account of a Child who had the Small-pox in the Womb.* In a Letter from William Wright, M. D. F. R. S. to John Hunter, Esq. F. R. S. p. 372

XXIV. *Natural History of the Insect which produces the Gum Lacca.* By Mr. James Kerr, of Patna; communicated by Sir Joseph Banks, P. R. S. p. 374

XXV. *Account of a Phenomenon observed upon the Island of Sumatra.* By William Marsden, Esq.; communicated by Sir Joseph Banks, P. R. S. p. 383

XXVI. *Farther Experiments on Cold, made at the Macfarlane Observatory belonging to Glasgow College.* In a Letter from Patrick Wilson, M. A. to the Rev. Nevil Maskelyne, D. D. F. R. S. and Astronomer Royal. p. 386

XXVII. *A general Theory for the Mensuration of the Angle subtended by Two Objects, of which One is observed by Rays after Two Reflections from plane Surfaces, and the other by Rays coming directly to the Spectator's Eye.* By George Atwood, M. A. F. R. S. p. 395

XXVIII. *An Account of the Ophidium barbatum LINNEI.* By P. M. Augustus Broussonet, M. D.; communicated by Sir Joseph Banks, Bart. P. R. S. p. 436

XXIX. *A further Account of the Usefulness of washing the Stems of Trees.* By Mr. Robert Marsham, of Stratton, F. R. S. p. 449

XXX. *Hints relating to the Use which may be made of the Tables of natural and logarithmic Sines, Tangents, &c. in the numerical Resolution of affected Equations.* By William Wales,

Wales, *F. R. S.* and *Master of the Royal Mathematical School in Christ's Hospital.* p. 454

XXXI. *Experiments on the Power that Animals, when placed in certain Circumstances, possess of producing Cold.* By Adair Crawford, *M. D.*; communicated by Sir Joseph Banks, *Bart.* *P. R. S.* p. 479

XXXII. *Account of a Comet.* By Mr. Herschel, *F. R. S.*; communicated by Dr. Watson, *Jun. of Bath, F. R. S.* p. 494

XXXIII. *A Letter from Mr. Joseph Willard to the Rev. Dr. Maskelyne, Astronomer Royal, concerning the Longitude of Cambridge in New England.* p. 502

XXXIV. *An Account of some Thermometrical Experiments; containing, I. Experiments relating to the Cold produced by the Evaporation of various Fluids, with a Method of purifying Ether. II. Experiments relating to the Expansion of Mercury. III. Description of a Thermometrical Barometer.* By Tiberius Cavallo, *F. R. S.* who was nominated by the President and Council to prosecute Discoveries in Natural History, pursuant to the Will of the late Henry Baker, *Esq. F. R. S.* p. 509
